PROFESSIONAL SUMMARY

Information Technology student at Bicol University and software developer with hands-on experience building web, mobile, and business applications. Delivered a commissioned application that cut a client's critical workflow from 4 hours to 1 hour (75% faster) with 3 client-approved features. As Proprietor / Manager of JRB Consumer Electronics Trading, built Calcuoke, a React and TypeScript application that automates cost calculations, transaction capture, and inventory records. Developed Flutter, Flask, and Node.js projects featuring OCR scanning, REST APIs, JWT authentication, role-based access control, and automated testing. Combines Python, Dart, JavaScript/TypeScript, and SQL skills with customer service and team leadership experience, having led 1 capstone and 2 academic team projects.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Dart, SQL, HTML, CSS, Java, C, C++

Frameworks and Libraries: React, Node.js, Express.js, Flask, Flutter, Tkinter, Tailwind CSS, Vite, Riverpod, Provider, Material 3

Databases and Data: MySQL, SQLite, Drift, CRUD operations, schema migrations, transactional updates, data validation, CSV/XLSX/JSON import and export, backup and restore

APIs and Security: REST APIs, API integration, JWT authentication, session management, role-based access control (RBAC), secure token storage

Testing and QA: Unit testing, widget testing, integration testing, golden tests, API contract testing, debugging, troubleshooting

IT Support and Systems: Computer System Servicing, networking fundamentals, application troubleshooting, point-of-sale (POS) and inventory systems, user support, Microsoft Excel

Mobile Development: Android, Flutter, APK/AAB builds, camera and barcode scanning, Google ML Kit OCR, local notifications, offline-first design

Tools and Practices: Git, GitHub, Figma, PyInstaller, layered architecture, requirements gathering, AI-assisted development, Canva

CORE COMPETENCIES

Application Development | Technical Support | Debugging and Troubleshooting | Software Testing and Quality Assurance | Database Management | Requirements Analysis | Customer Service | Team Leadership | Project Planning | Task Prioritization | Documentation and Record Keeping

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Commissioned Custom Application

- Developed a custom application for a time-consuming client workflow, reducing completion time from 4 hours to 1 hour, a 75% improvement.
- Gathered and analyzed client requirements and translated them into 3 client-approved application features.
- Applied AI-assisted development tools to programming and troubleshooting, reducing development time by 20%.

Proprietor / Manager | JRB Consumer Electronics Trading | 2024 - Present

- Built Calcuoke, an in-house React and TypeScript business application for karaoke system assembly, sales records, and inventory management.
- Automated assembly cost calculations and transaction capture, and implemented inventory validation, search, filtering, and component replacement history for traceable records.
- Maintained sales and inventory records, resolved customer product and purchase concerns, and coached staff on productivity and customer service.

PROJECTS

CardScan - OCR Scanning App | Flutter, Dart, Google ML Kit, Drift/SQLite

- Built an offline Android OCR scanner that validates 16-digit prepaid-card codes and prevents duplicates across batches and archives.

- Implemented batch editing, XLSX import/export and sharing, camera lifecycle handling, and automated workflow tests.

KaraOK - Audio Assessment Application | Flutter, Dart, Python, Flask, MySQL

- Built recording and upload features, waveform and spectrogram reports, and saved-result comparisons on a Flask REST API backend.
- Integrated JWT authentication, session restoration, and secure token storage, keeping guest records separate from signed-in user data.
- Added automated tests for session persistence, reports, and API contracts; configured Android APK/AAB build tooling.

LnPulse - Academic Group Project | React, Node.js, Express.js, MySQL

- Corrected backend role-based access control checks to enforce permissions on authenticated API requests.
- Added subject, student-list, and department pages and created Figma prototypes.

EDUCATION

Bachelor of Science in Information Technology | Bicol University | 2023 - Present

- Relevant Coursework: Web Development, Networking
- Led 1 capstone project and 2 academic team projects, coordinating responsibilities, prioritizing tasks, and tracking deliverables against deadlines.
- Activity: Sports Club Deputy Finance Officer

Computer System Servicing (Senior High School) | Ligao National High School | 2021 - 2023

- Work Immersion (OJT): Customer Assistance, LTO RV
- Member, Drivers of Technology (DotOrg); Grade 12 Representative
